"Class of 81!"

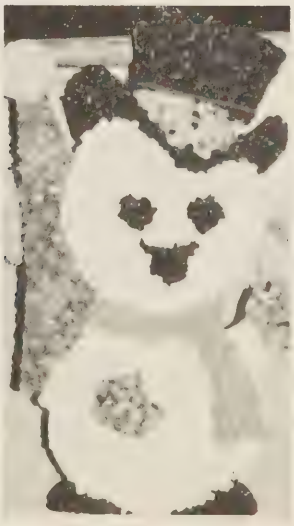
We Gave a Gift of Love . . .

Santa gave Mr. Stone and Mrs. Walker their Christmas presents.

Mrs. Price, Mr. Neel, and Mrs. Hill showed their musical talents.

Mr. Elliott received a gift from the choir.

The choir sang Christmas carols.



Gary played his drums.

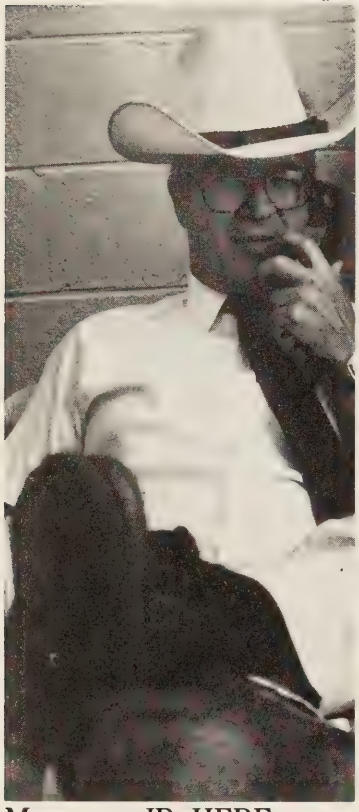
ADMINISTRATION

To the Administration We Gave Our Appreciation

The class of "81" gives to you, Mr. Stone, our love and our thanks for what you have given to us to insure our future.

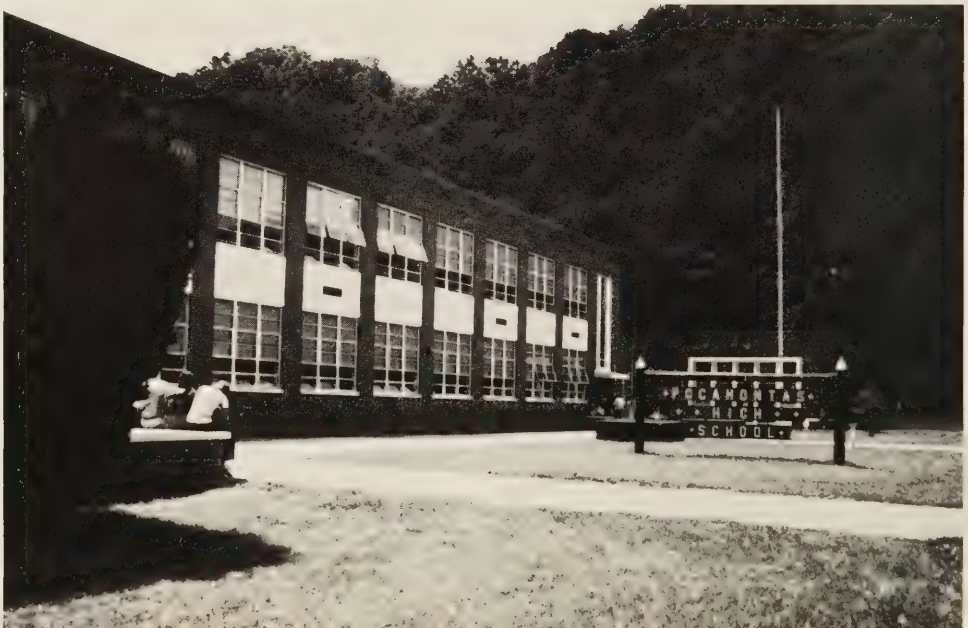
Now Mrs. Gentry!!!

Oh, it can't be that bad.



Move over JR, HERE comes BR!

Attention!!



We Gave Special Thanks to Mrs. Walker . . .

and to Mrs. "D" We Gave a Medal

Is Pete lying around again?

Mrs. Trigg, eating again!

Big Steve and Big Mel

Mrs. Gentry's History class gave her a surprise party!

Open wide!!!

Wonder who is camera shy?

Howard Williams gave to everyone a new sense of Faith and Courage . . . but most importantly he gave to everyone a part of himself. In Howard's own words, we are reminded of the simple truths we too often take for granted, but truths that comprise the whole of life regardless of the time we are allotted here:

My American Dream
by Howard Williams

My American Dream is to live and be happy. I just want to live a simple comfortable life with my family. I wouldn't want to be a real rich person. It seems the more money you have the more you want, and that makes rich people miserable. On the other hand, I don't want to be a really poor person either. I just want to make enough money to get by.

For my career I would like to be a state policemen. Laws are made for the good of all the people, and I dislike people who hurt themselves and others by breaking the law. This would be an exciting job, and I would have a reasonable amount of time to do other things I like to do. As a state policeman, I would make enough money for all my needs.

My dream for America is that we may stay out of war, and that we may remain free.

Thank you Howard!

the Challenge

From the atom to the sun . . . the universe pulsates with energy in many forms.

The challenge is to find ways . . . new ways . . . to utilize the earth's vast storehouse of fuels in providing the energy needed for this nation to continue to be great.

The means — innovative technologies, exotic engineering, dynamic architecture — exciting advances that must come if man is to tap Nature's lode for the energies he needs.

From the smallest part of the universe to the largest . . . that's the scope of the energy field today. The opportunity for personal achievement is infinite; the challenge, one that must be met.
